#17 REV. A New Deutsch Coils

This bulletin is to provide information on the new deutsch coils. These coils are available in parts inventory now and can be ordered when needed. There are multiple reasons we are going to these from the old DIN style.

1. They are watertight, assisting with a longer life span.
2. The deutsch connector makes them plug and play, meaning no more soldering like the DIN style.
3. We have sent deutsch crimp kits to all the branches to support having to make quick repairs in the field.
4. Make sure to use dielectric grease when they are installed. **(See service bulletin #14)**

- | | | | |
|----|---------|-------------------------------|--|
| 1. | 1002078 | Coil Integrated-Deutsch-D03 | This is for the small drive manifold coils. |
| 2. | 1002077 | Coil Integrated-Deutsch-D05 | This is for the clamp and large drive coils. |
| 3. | 1002076 | Coil Integrated-Deutsch-Hi/Lo | This is for the drill shift coil. |

These coils are for all new style A.P.E. power unit manifolds. If you need to get a different coil for an older style unit we will work on figuring out what one you need and create an item number for it for future use. We suggest that if you have a coil failure it should be replaced with a deutsch coil and cable. **(For cable info. see service bulletin #15)** This will cut down on service calls and promote a better quality of A.P.E. product.
