#3 Piston Clamp Pump

The gear pump that we have used for many years has been upgraded to a bent axis piston pump. This is a direct replacement pump that will allow full clamp pressure to be achieved within the pumps high pressure rating. Piston pumps also run cleaner, generating fewer particulates, meaning less contamination in the hydraulic system. Port sizes are the same as the clamp gear pumps that were on power units manufactured before June 2014. The fittings and hoses can be reused when a retro fit is completed, with the addition of a case drain line to tank.

533012- Piston Clamp Pump AA2FM16/61W-VSC530

Luck runs out but safety is good for life.
